

Carlitos Willis

Full-Stack & Growth Engineer

Los Angeles, CA · carlitoswillis@berkeley.edu

carlitoswillis.github.io · linkedin.com/in/carlitoswillis · github.com/carlitoswillis

SKILLS & COMPETENCIES

A/B Testing & Experimentation | React & TypeScript | Data Pipelines & Web Scraping

Internal Tooling & Automation | Cloud Deployment (AWS, Docker, Nginx) | AI-Assisted Development (Claude)

Languages | JavaScript (ES5/ES6), CSS3, HTML5, Ruby, TypeScript, Python, Rust, SQL

Technologies & Frameworks | React, Next.js, Ruby on Rails, Node, Express, Amplitude, Optimizely, Selenium, Playwright, Jest, Postgres, MySQL, SQLite, Mongo, AWS CLI/EC2, Docker, Vercel, Render, Git, GitHub Actions, Webpack, Styled-Components, Datadog, Postman, MCP, Claude

EXPERIENCE

Independent Software Engineer & Consultant | Los Angeles, CA

November 2023 – Present

- Built data aggregation tools in Python and Node.js to track audience growth and engagement across Spotify, TikTok, and YouTube, consolidating data into PostgreSQL.
- Developed Selenium-based web scrapers and API integrations to ingest **5K–20K+** data points daily, normalizing inconsistent schemas across platforms.
- Designed automated data pipelines to process streaming and social data, generating growth signals used to evaluate dozens of emerging recording artists.
- Turned pipeline output into audience-targeting, engagement, and release-planning decisions for music-industry stakeholders.

Full-Stack Growth Engineer | Gusto | Los Angeles, CA

Oct 2021 – Oct 2023

- Designed and executed dozens of A/B tests with React, TypeScript, and Ruby on Rails — nine in just six months — helping drive a **15.5%** increase in Visit-to-Lead CvR and a **5.8%** YoY increase in Direct 30-day Lead-to-Join CvR.
- Led the redesign of the experiment tracker and built an in-house testing hub, cutting experiment setup time **40–60%** and increasing process transparency.
- Owned the off-hours Schedule-a-Call experiment, a **10%** relative increase in payrolls run over control.

Digital Marketer, Music Producer | Freelance | NYC + LA

2018 – 2020

- Automated content planning, creation, and marketing workflows using Python scripts to fill templates, enhancing operational efficiency and reducing onboarding time.
- Overhauled lead gen for businesses and recording artists through landing pages with tracking pixels.

Media Fellow | UCSA (Non-Profit Org) | Berkeley, CA

2017 – 2018

- Expanded social media reach **10x** with targeted advertising, analytics, and custom Python scripts.

PROJECTS

Working Memory | Event-sourced task board you can rewind to any past state

Next.js, TypeScript, React, SQLite (better-sqlite3), Litestream, Backblaze B2, Docker, dnd-kit, Tailwind

- Built an append-only, event-sourced task board where every edit, move, and completion is journaled by SQLite triggers, so the board's full state is reconstructable at any past moment, with multi-account isolation enforced at the query layer. Built with AI coding agents under a verification-first workflow: plans before code, a **243-check** test suite before release.

armak.tech | Production website for a Southern California low-voltage & networking firm

Vite, EJS, Vanilla JS, HTML Canvas, Web3Forms

- Shipped the live production site for a real contractor: a static Vite + EJS build with hand-written HTML Canvas animations lazy-loaded per viewport, a backend-less Web3Forms lead form, and full Open Graph/SEO metadata — cutting Largest Contentful Paint **~90%** with WebP heroes, preload, and fetchpriority.

Incighder | Music-scouting tool that scores artist traction and trajectory from public platform metrics

Next.js 15, React 19, TypeScript, Python (Flask), TiDB Cloud Serverless (MySQL), Spotify / YouTube Data APIs, SSE, MCP

Expert | Personal-knowledge tool that makes everything you've read searchable by content

React, Node.js, Express, JSON store (MySQL optional), MuPDF + Tesseract.js (WASM OCR)

Ezzy Shop | E-commerce product service split into independently-scaled microservices

AWS EC2, Nginx, Redis, PostgreSQL, Node.js, Express, React, Docker, K6, Loader.io

Ableton Library | Local-first catalog of a producer's Ableton projects, searchable by tempo, plugin, sample, or artist

Rust, Tauri, TypeScript, React, SQLite (FTS5), Python

EDUCATION & PROFESSIONAL DEVELOPMENT

University of California, Berkeley | Bachelor of Arts, Cognitive Science

2021

Galvanize | Advanced Software Engineering Immersive at Hack Reactor

2020

Formation Fellowship | Personalized coaching from top-tier SWEs

2021, 2026
